Title: METHOD AND SYSTEM FOR DYNAMICALLY GENERATING OBJECT CONNECTIONS

Page 2

Dkt: 777.115USR

*Sub B4*  
*1st Cl*  
*3rd Cl*

47. [New] A computer-readable medium having stored thereon an object connection architecture comprising:

a plurality of sink objects, each sink object having a notification function member for communicating with the sink object from a source object; and

a plurality of source objects, each source object having a plurality of connection point objects, each connection point object storing a plurality of notification function members and returning an identification of one of the notification function members from the stored plurality of notification function members upon request.
